

Get more with WinZoom!

WinZoom gives you magnification that enlarges material on your computer screen. If you have been having problems reading your computer screen, WinZoom is IDEAL for you.

✓ Installation

A simple to use USB thumb drive makes the WinZoom 100% portable. It is a plug and play no installation required which means you don't have to have administrator privileges.

WinZoom will run on any public computer. Simply insert the USB drive and you are ready to go. Use the WinZoom safely anywhere; at a hotel, public library, friends home, or family computer. Remove the USB drive and NO software is left. WinZoom leaves no trace behind! All the other software requires administrator privileges and a full installation process.

✓ Speech

Speech output is included in the WinZoom standard product at no extra cost to you.

✓ Price

WinZoom is offered at \$299 with speech output. Compare to ZoomText, Lunar Plus and MAGic at \$595. The others without speech are still higher in cost at \$395. Why pay more for less features and a higher price? WinZoom is also available on a USB thumb drive for \$399. ZoomText with speech on a USB thumb drive is \$695 and the Lunar Plus Pen is \$690!

Stretch your dollar with WinZoom. More value, less cost. If you are a sight center or government agency where funding is a continual challenge keep this in mind. You can spend the same amount on 10 copies of the other software or buy 20 copies of WinZoom. The value is there!

✓ Compatibility

WinZoom is 100% 64 bit Vista compatible.

Hands down, WinZoom beats the competition!
